

500 ENGINES. 2500 HORSES. 0 FAILURES.

In the four years that Andy Jensen has been using Engine Pro performance engine bearings, he's racked up some pretty remarkable numbers. The owner of Jensen's Engine Technologies has turned out 500 high performance engines. His own race car routinely cranks out more than 2500 horsepower on American drag strips. And the most impressive number of all? Zero failures.

- Trimetal Construction
- Oversized Chamfers for Large Radius Fillets
- High Crush and No Flash Plating to Improve Seating
- Medium Eccentricity to Maintain Uniform Oil Clearance
- Thinner, High Strength Overlay to Increase Fatigue Strength
- Wall Tolerance +/- .00015" to Maintain Accurate Clearances
